1. ✓ What is the primary purpose of marking rows with an owner field?
  - ☐ To save space in the rows
  - ☐ To make sure un-owned rows can be quickly removed
  - ☐ To charge each user based on the number of rows
  - ☒ To know which rows can be edited or deleted by the current logged in user
2. ✓ Which of the following methods is called first in the Django generic list view?
  - ☒ setup()
  - ☐ get()
  - ☐ get\_queryset()
  - ☐ render\_to\_response()
  - ☐ startup
3. ✓ Which method do we override in the Django generic list view to keep users from making changes to rows they don't own?
  - ☐ setup()
  - ☐ get()
  - ☒ get\_queryset()
  - ☐ render\_to\_response()

选择语言 | ▼

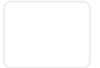

☐ startup  
Done

4. ✓ What does OwnerUpdateView do if a user tries to delete a record that does not belong to them?
- ☐ It puts out an error message in the JavaScript console
  - ☐ It redirects the user to [www.djangoproject.org](http://www.djangoproject.org)
  - ☐ It stops and fails with an error log message
  - ☒ It returns a 404 (not found error)
5. ✓ What is the template variable that indicates the current logged in user?
- ☒ user
  - ☐ tsugi.user
  - ☐ article.owner
  - ☐ myarts.owner
  - ☐ request.user
6. ✓ What is the name of the model that Django uses to store User objects?
- ☒ settings.AUTH\_USER\_MODEL
  - ☐ DjangoUsers
  - ☐ settings.USERS
  - ☐ django.users
  - ☐ Users
7. ✓ What is the database relationship between the Article model and User model?
- ☐ One-to-One
  - ☐ Zero-to-Zero
  - ☐ Many-to-Many
  - ☒ One-to-Many
8. ✓ In the views.py in the myarts sample code what is the purpose of the "fields" class-wide value?
- ☐ To double check that model fields are not missing
  - ☐ To make the listed fields un-editable

Done ☐ To list the fields that will be autosaved

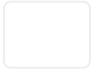

☒ To limit the model fields displayed in the form

9. ✓ For a data model named Frog, what is the generic Edit View convention for the template used when editing a Frog object?
- ☐ frog\_update.html
- ☐ frog\_modify.html
- ☐ frog\_edit.html
- ☒ frog\_form.html
10. ✓ In the OwnerCreateView class, what method is overridden to set the "owner" field to the current logged in user?
- ☐ save(commit=False)
- ☐ LoginRequiredMixin
- ☐ add\_owner()
- ☒ form\_valid()
11. ✓ In OwnerUpdateView, how do we make sure that the current logged in user cannot retrieve any rows that don't belong to them?
- ☐ We retrieve all the objects and throw away the non-owned objects
- ☐ We call the method of the same name in the super class
- ☐ We intercept the SQL and add a WHERE clause
- ☒ We add a model filter
12. ✓ In OwnerUpdateView, which is the "super" or "parent" class?
- ☒ UpdateView
- ☐ get\_queryset()
- ☐ SuperUpdateView
- ☐ UpdateView::Super
- ☐ OwnerUpdateView
13. ✓ When a generic edit view is receiving POST data which of the following steps is done first?

Done

- ☒ clean()
- ☐ form\_valid()
- ☐ first\_post()
- ☐ pre\_post()
- ☐ get\_query\_set()

14. ✓ Why do we insist on producing a delete confirmation screen?

- ☐ Because Django would not be able to delete the data
- ☐ To make sure that there are no JavaScript errors
- ☐ Because a POST request cannot modify data
- ☒ Because a GET request should never modify data
