1. ✔ In the class django.views.generic.list.ListView, which of the following methods is called earliest in the process?

   ○ get_queryset()

   ○ get_context_data()

   ◉ get_template_names()

   ○ render_to_response()

2. ✔ In the class django.views.generic.list.ListView, which of the following methods is called latest in the process?

   ○ get_queryset()

   ○ get_context_data()

   ○ get_template_names()

   ◉ render_to_response()

3. ✔ In the class django.views.generic.detail.DetailView, which of the following methods is called earliest in the process?

   ○ get_queryset()

   ○ get_object()

   ◉ dispatch()

   ○ render_to_response()

4. ✔ In the class django.views.generic.detail.DetailView, which of the following methods is called latest in the process?

選择语言 ▼

Done

○ get_queryset()

○ get_object()

○ dispatch()

⦿ render_to_response()

5. ✔ By convention when using an app_name of "abc" and a model of "Dog", if you use a View that extends django.views.generic.detail.DetailView, what is the file name that will be used for the template?

○ templates/abc/dog_detail.djtl

○ templates/dog_detail.djtl

⦿ templates/abc/dog_detail.html

○ templates/doc/abc_detail.djtl

6. ✔ If you want to override the template name chosen by convention in a View that extends django.views.generic.detail.DetailView what is the name of the class attribute variable that you use?

○ template

○ template_override

⦿ template_name

○ template_extend

7. ✔ By convention when using an app_name of "abc" and a model of "Dog", if you use a View that extends django.views.generic.list.ListView, what is the name of the context variable that will include all the Dog objects in the template when it is being rendered?

○ dogs

○ dogs_select

⦿ dog_list

○ dogs.values()

8. ✔ For the following line in a views.py file

```
class ArticleListView(ListView):
```

what is the best description of "ListView"?

○ The class that is being created

选择语言 ▼

○ The name of a view function

◉ The class that is being extended

○ The first parameter to the render() method

9. ✔ For the following line in a views.py file

```
class ArticleListView(ListView):
```

what is the best description of "ArticleListView"?

◉ The class that is being created

○ The name of a view function

○ The class that is being extended

○ The first parameter to the render() method

10. ✔ For the following line in a urls.py file

```
urlpatterns = [
    path('', TemplateView.as_view(template_name='gview/main.html')),
    ...
```

Where would you find the actual code for TemplateView?

○ In views.py

○ In settings.py

◉ Somewhere in the Django source

○ In urls.py
